

# **Energy Code for the State of Tennessee**

Currently (as of Jan/2008), the State Energy Code for commercial applications in the State of Tennessee is ASHRAE 90A-1980 and 90B-1975. Compliance is voluntary.

Tennessee is a "home rule" state which leaves adoption of codes up to the local codes jurisdictions. In Tennessee, local codes jurisdictions have the option of upgrading the energy efficiency code to 2000 IECC with 2001 Supplement or 2003 IECC.

The following Tennessee local jurisdictions have adapted 2003 IECC: Brentwood, Chattanooga, Cowan, Franklin, Gallatin, Gooslettsville, Greenbrier, Lakesite, Marion County, Millington, Pleasant View, Spring Hill, Tullahoma.

The following Tennessee local jurisdictions have adapted 2000 IECC with 2001 Supplement: Cheatham County, Columbia, Crossville, Rutherford County.

It is advised that you consult your local jurisdiction in Tennessee for Energy Code compliance.
